Title:

Media Management in Peace Operations: Joint Doctrine and the Evolving Media-Military Relationship.

Corporate Author:

NAVAL WAR COLL NEWPORT RI JOINT MILITARY OPERATIONS DEPT

Personal Author(s):

Shaffer, J. D.

Report Date:

07 FEB 1997

Media Count:

26 Page(s)

Descriptors:

*MILITARY OPERATIONS *MILITARY PERSONNEL *MEDIA *PUBLIC RELATIONS, MILITARY HISTORY, POLITICAL SCIENCE, LESSONS LEARNED, MANAGEMENT, MILITARY DOCTRINE, BATTLEFIELDS, SECURITY, THESES, PLANNING, MISSIONS, JOINT MILITARY ACTIVITIES, INTERFERENCE, ACCESS, GUIDANCE, LOSSES, SOMALIA, MILITARY COMMANDERS, HAITI, CENSORSHIP, JOURNALISM, PEACEKEEPING.

Identifiers:

MILITARY MEDIA RELATIONS, PEACE OPERATIONS

Abstract:

Because of the public and political nature of peace operations, it has become essential for the commander to make effective operational use of the mass media in order to achieve his objectives. To do so, the operational commander and his staff must have a thorough understanding of the media's historical and

Title:

Embedded Media: Failed Test or the Future of Military/Media Relations?

Descriptors:

*MILITARY FORCES(UNITED STATES), *PUBLIC RELATIONS, *MASS MEDIA, MILITARY OPERATIONS, MILITARY HISTORY, IRAQ, NATIONAL SECURITY, UNCONVENTIONAL WARFARE, VIETNAM, PANAMA, GRENADA, PERSIAN GULF WAR.

Abstract:

Since Vietnam the United States military has had a tenuous relationship with the American Media. Although both institutions serve to protect the constitution a palatable distrust has defined the relationship; a distrust that seems to reach its apex when the country is at war. On one hand the military has viewed the media as intruding on its operational jurisdiction willing and desiring to report on any negative events resulting from an operation. Concurrently the media has viewed the military as a closed society accountable to the American people yet not open to scrutiny by the same people it has sworn to protect. This pervasive distrust was evident during Vietnam Grenada and Panama and reached its peak during Desert Storm. After Desert Storm a series of dynamics served to relieve some of the tension between the military and the American media and set the stage for the advent of the Embedded Media Program experienced in Operation Iraqi Freedom. This student paper will address the historical relationship between the United States military and the American Media analyze where that relationship stands presently and propose a course for the future.

Local Security Domains Increase Flexibility And Security

"Delegating domains works a lot like delegating tasks at work. A manager may break up a large project into smaller tasks and delegate responsibility for each of these tasks to different employees."[1]
2. [D](#)
...
su
ad
htt
The typical government or large corporation approach to **computer** security is to establish a central organization to set standards and practices. This has the advantage of uniformity, but the central office is often far away from and out of touch with, both the technologies employed by and the work that is being done by the employees. The results are often standards and regulations that are out of date and authoritarian in nature. One of the greatest benefits a centralized security office can provide are Security Best Practices that apply to current **computer** architectures and balance a reasonable application of security against the time and cost to provide same.
3. [NS](#)

United States Army Military Police School

Special Tactics Training Division

The Special Tactics Training Division conducts advanced Law Enforcement training for Department of Defense personnel. STTD is responsible for conducting five programs and supporting one. These courses are designed to meet the diverse training needs of advanced law enforcement functions.

Special Reaction Team

[SRT Phase I](#) Course / [SRT Phase II](#) (Marksman/Observer) Course

The Special Reaction Team Phase I and Phase II (Marksman/Observer) courses provide training for those personnel responsible for performing Special Reaction Team duties and responsibilities. The Special Reaction Team provides commanders with an enhanced response force capable of responding to and resolving special threat situations (terrorist incidents, barricaded incidents (with and without hostages), drug raids, high risk warrant apprehensions. These courses are designed to meet DOD directives and service regulatory requirements (Army, Marines, and Air Force) for **Antiterrorism** phase II response force requirements. The SRT phase I course is designed for entry teams with an emphasis on various building clearing schemes of maneuver and advanced marksmanship. The SRT phase II course trains marksman/observer teams in tough and realistic intelligence gathering and special shooting situation practical exercises.

Who We Are

The Defense Technical Information Center (DTIC®) is **THE premier provider of DoD technical information**. DTIC serves as a vital link in the transfer of information among DoD personnel, DoD contractors and potential contractors and other U.S. Government agency personnel and their contractors. DTIC is a DoD Field Activity under the Under Secretary of Defense for Acquisition, Technology and Logistics, reporting to the [Director, Defense Research & Engineering \(DDR&E\)](#).

Why We Do What We Do

- Provide direct information support to the warfighter.
- Leverage the multi billion dollar investment in DoD scientific and technical research.
- Prevent unnecessary or redundant research from being performed at taxpayer expense.

Title: Military-Media Relations: A Study of the Evolving Relationship During and After the Gulf War.

Descriptive Note: Master's thesis,

Personal Authors: Kemper, Antoinette T.

Report Date: 10 DEC 1996

Pages: 175 PAGES

Report Number: AFIT-96-093

Abstract: The study examines the status of military-media relations in the aftermath of the Gulf War. Based on public relations theory, studies on source- journalist relationships, the historical precedence of wartime military-media relations, studies about military public affairs, and critiques of the Gulf War situation, the author assesses the Gulf War media policy, the post-Gulf War revised DoD policy, and their impact on present relations. The perspectives of media representatives, military representatives, and communication scholars about Gulf War and present military-media relations were gathered through interviews. Findings of each study group were analyzed and compared. Findings of previous studies on the subject are also discussed. The researcher concludes, while some provisions of the Gulf War policy did not facilitate open media coverage, problems in the policy's execution created more tension between the military and the media. Hostility towards the media also remained from the Vietnam era. Military commanders' support is also a prerequisite for media access to units. Military education programs to foster a better appreciation of a free press' role free in a democracy are needed for all members. In addition, the author recommends additional public affairs training, including a mentoring program, be instituted. Also, while the military should continue to provide opportunities for reporters to participate in training exercises to learn about the military, it is unrealistic to expect that most reporters can participate due to shrinking resources at news organizations. Finally, military and media representatives continue a dialogue to regularly discuss issues of mutual concern.

Abstract:

(U) During Operation Iraqi Freedom (OIF), the U.S. Department of Defense instituted a program to attach civilian journalists to coalition military units. Their purpose was to report firsthand on the military campaign to topple Saddam Hussein. These "embedded journalists," as they were called, would travel, eat, sleep, and endure the same hardships and dangers of the soldiers and Marines they were accompanying. While their immediate and highly dramatic accounts offered a perspective not before seen by the news-hungry U.S. public, they also raised questions about whether the "embedding" process resulted in a more thematically narrow coverage of the war. This study addresses the newspaper coverage of OIF by examining the content of the embedded and non-embedded war reporting of various highly circulating U.S. newspapers. It is posited that being attached or embedded with U.S. military units resulted in journalists producing a body of stories concerning military operations and personnel that was markedly different from the stories of non-embedded reporters during OIF. (15 tables, 104 refs.)

PMT

The Work Breakdown Structure (WBS) of the Program Manager's Tool (PMT) has been realigned to reflect the newly revised MIL-HDBK-881A (Work Breakdown Structures for Defense Materiel Items). Key changes include: addition of a new WBS for Unmanned Air Vehicle (UAV) Systems; restructuring of the Space Systems WBS to include level 4 elements; addition of a new level 3 element, Vetronics, to the Surface Vehicle Systems WBS; and the addition of a new level 3 element, Crew Station, to the Aircraft Systems WBS.

ASSIST-Quick Search provides direct access to Defense and Federal specifications and standards available in the official DoD repository, the [ASSIST](#) database. Enter your search criteria in one of the search fields to locate documents available for distribution by the [DODSSP](#). Click on the label next to each search field block for a description and examples of search criteria.

(Please note that you can enter search criteria in more than one search field; however, Quick Search will then only find documents that satisfy *all* of the specified search criteria. If your search doesn't yield the results you expected, please try again using only one search parameter, such as the document number.)

Public STINET is free of charge and requires registration upon document ordering. It provides access to citations to unclassified unlimited documents that have been entered into DTIC's Technical Reports Collection since December 1974 as well as some documents that may be ordered online. Users may order documents online from the collection to make

Handle Service

Is the information you need getting "Error 404" message? DTIC's Handle Service assigns permanent names and stores them in its Handle Service. The current location (or URL) where the resource can be found is stored with the handle. When the location changes, the handle record is updated to reflect this change, and there is no broken link. DTIC's Handle Service also facilitates the preservation and long term access to electronic resources, ensuring their availability over time and changing data formats. DTIC's Handle Service will play a vital role in preservation of DoD's Internet-accessible resources.

The **Handle Service** tracks changes in URLs.
No More Broken Links!
